**Katy Perry vs Taylor Swift**

Katy Perry and Taylor Swift are both amazing artist, but who knew that they had feud with each other? Taylor Swift was in an interview Tuesday morning and she announced that she has a new song coming out called "Bad Blood" and she says it's about the feud between her and another female artist known as Katy Perry. Taylor Swift says Katy Perry would come up to her at every award show, say something then walk away, and she didn't know if they were friends or if she was being insulted by the female artist. She also said Katy Perry did something really horrible (she didn't actually say what it was) and that's when they became enemies. Taylor Swift said their issues were over business not a boy, but both of them dated John Mayer. Before that they were award show besties until Katy Perry showed up at the award show with John Mayer and made things a little awkward. Some people also think that Taylor Swift's new song could be about Miley Cyrus or Carrie Underwood.

**Carlos Coy** he was born October 5, 1970, better known by his stage name **SPM South Park Mexican**, is an American rapper, and convicted felon. His stage name is derived from the South Park neighborhood in Houston, Texas, where he was raised. His family moved from southeast Houston to South Park. Coy began as a Christian rapper but felt that doing so made him an out-cast. In 1995, Coy, along with his brother Arthur Jr. from Texas founded his own record label. As SPM, Coy released one album in early 1995, *Hillwood*, through his label with distribution in Houston under Southwest Wholesale. On September 25, 2001, Houston police arrested Coy on a charge of aggravated sexual assault of a child who was then nine years old, but he was released from county jail after posting bail. On May 18, 2002, a Houston jury convicted Coy of aggravated sexual assault of a child. He was sentenced to 45 years in prison on May 30 and ordered to pay a \$10,000 fine. SPM is incarcerated in the Allred Unit in Wichita Falls, Texas. Coy is eligible for parole in 2024. His projected release date is April 8, 2047.

In St. Louis at Washington University, it was discovered that Schizophrenia was n' t just a single disease. It' s actually EIGHT! They all have their own genetic footprint and different severities of the symptoms. Before, it was only thought that it had been one disease but five different subtypes: Residual, Catatonic, Paranoid, Disorganized and Undifferentiated. Anyways, this discovery was made after analyzing the symptoms and genetic coding of 4200 patients with schizophrenia and 3800 healthy controls. The percentage of inheriting this disease is really increasing. Scientists have struggled to locate the specific genetic malfunctions that are particular to the mental disorder. I wouldn't freak out but you never know that you could have this mental disorder. Signs and symptoms don' t really show until the early 20' s.

This is going to be mainly Viewer submitted work ( original work only). We will accept all of them but not all will be printed. There are boxes in the library for you to submit your work. You can use your own name or be anonymous if that suits you more. The only thing that we ask is that you don't submit things that use profuse language or explicit imagery because we are not allowed to print those. We hope to hear from you talented people soon!

The tank requires a filter to filter out the water and chemicals are needed to DE chlorinate the water. They can go with any fish that can't eat it. They eat any kind of food such as flakes, pellets, and live worms. With all the different kinds of goldfish they all are handled the same way. The size of the goldfish or koi will vary in the size of the tank they will live in.
