

Donaldson Career Center

2007-2008

Construction

We have a lot planned for this year, our main goal is to prepare students for the work force of our great country.

Last year we started a two bedroom two bath home that will be solar heated, an air heating Solar Attic will collect the energy it will then be sent to the living space or the storage medium below the house.

Students will build the cabinets, install the rough electrical and rough plumbing.

As the students complete the required curriculum in each step of construction they will be listed with their own personal record at the N C C E R national data base.

This is a 2 bedroom house students started to built last year.

Instructor

Floyd R. Granger

I retired from construction in 2000 after 40+ years in the trade. I held these License in my profession:
S.C. Residential Home Builders
S.C. General Contractor (Specialty)
S.C. Mechanical Contractor
Greenville County HVAC Master Mechanic

During 1978-1983

During 1978-1983

I received two awards from the US Department of Housing and Urban Development for Passive Design of a Solar Heated House.

The company I was involved with received several Grants to demonstrate Solar Heated Buildings throughout the United States.

2004

I enrolled at Greenville Technical College in the Aircraft—Maintenance course and completed it in 2006 with the FAA Certification of A/P Mechanic. October of 2006 I came on board at Donaldson Career Center as a Substitute Teacher and then applied for full employment in this 2007—2008 School year.

STORAGE BUILDINGS FOR SALE

Our students have built many storage buildings over the years

Our students have built many storage buildings over the years.
The school will sell them to the general public when completed.
They are small enough that they can be moved and delivered with a roll back
Tow Truck.
