

East North Street Academy of Mathematics and Science in Greenville, South Carolina, has been a magnet academy since 1997. All instruction is aligned to South Carolina standards. Math and science are infused into all subjects. Quarterly rotations help students create strong foundations in math and science.

MATH

East North Street Academy teaches an exciting math program, Math Out of the Box. We are the only school in Greenville County using this stimulating curriculum. It is a K-5 mathematics curriculum program developed in the College of Engineering and Science at Clemson University. This math curriculum distinguishes itself from other inquiry-based math programs in the areas of differentiated instruction, professional development, curriculum design, transferability, material support, and community support. Projects are embedded within each unit of instruction. Students who score in the top 15% on MAP in grades 3, 4, and 5 are invited to participate in math enrichment opportunities.

Our school has a math coach who works closely with teachers and students daily in the math lab or in the classroom.

SCIENCE

All students (4K-2nd) go to the science lab once a week. Our 3rd, 4th, and 5th grade students have science lab twice a week. Our business partners play an integral part in our magnet program.

- + **Master Gardeners** – Grade level Planting Projects
- + **Duke Power** – Participate in Rotations constructing Circuits
- + **Greenville Zoo** – Educational program to support our school wide theme – Circle of Life, Watch Us Grow
- + **Walmart** – Applying for a Matching Grant for a Carolina Garden
- + **Vulcan Materials** – Gift of our State Rocks, participate in Rotations, field trips to Piedmont Rock Quarry, Financial Support for a School Project
- + **Roper Mt. Science Center** – Discovery Day, Video Conferencing Loan, Summer Camp scholarships, Family Day for our school on Second Saturday, First Choice of Prescheduled Science Trips, Recycling Project, Observatory Night, PTA Event
- + **Michelin Corporate Office, North America** - Afterschool LEGO Robotics Team, Science Fair Mentors, Reading and Math Mentors, PBIS Student Store Incentives, Grade Level Rotations
