

The A.L.I.V.E series offers K-12 classroom teachers curriculum designed specifically for their needs. Teachers learn how, when, and where to incorporate technology tools and resources into their teaching. They also learn how to create assessment tools and align lesson plans with state and national standards. The goal is to prepare today's teachers and students for tomorrow's demands. Topics include:

- Hands-on use of the Interactive Whiteboard
- Project-Based Learning
- Web page design
- Multimedia presentations
- Development of a showcase unit plan

Emphasis is on effective use of technology in the classroom, research, communications, and productivity strategies, and working in teams to solve problems. This course relates to the College of Charleston conceptual framework and theme of making the teaching and learning connection by helping teachers to be more familiar with how to integrate technology and align their curriculum with the standards.

The course meets weekly at Wade Hampton High School from 4:00PM to 8:00PM beginning Tuesday, September 28, 2010 and ends Tuesday, December 7, 2010. This course will also meet the requirements for technology proficiency. Just like Intel, graduate credit is also available.

Interested persons need to register on the Portal, search for "A.L.I.V.E."
