

New Demographics Verify Screen

PowerSchool now has a new page, **Demographics Verify**. Parent portal will permit parents (and only parents) to make changes to their demographic data. Please be aware that these changes do not change the primary PowerSchool demographic data until approved by the school. This feature will permit parents to update their demographics data, including the “guardian” email address which is used for SchoolMessenger.

How it works:

1. Parents log into Parent Portal and select the Student Information icon at the top of the page.

2. Parents can see their existing information on file with the school in the left hand column.
3. Parents can type in updates to any of these fields in the right hand column.
4. Parents click on the Submit button at the bottom of the page.
