

Science Fair Project

Dear Parents,

It is that time of year again—time for the Science Fair! **It is mandatory for all 4th graders to complete a science fair project.** The science paper is optional; however, if your child's project is chosen to go to Roper Mountain for the district science fair, they may be required to write a science paper. The individual student project is an at home assignment. This major project will count as 3 test grades: project grade, oral presentation grade, overall grade (combined score).

The final project deadline is on February 4, 2010 by 9:00 am. Your child will also have mini-deadlines for the different parts of the project. I will be checking to make sure the students are working on their project and that they are not waiting until the last minute. I want to make sure your child understands what is expected and they are able to complete this assignment. **The class deadline dates are:**

Wednesday, Dec. 16th—Title & Question
Friday, Jan. 8th—Prediction & Material List
Friday, Jan. 15th—Purpose & Procedure
Friday, Jan. 22nd—Variables
Friday, Jan. 29th—Results & Conclusion
Thursday, Feb. 4th—Project Board Due by 9:00 am

By following the deadlines specified above, your child should be able to complete their project in time for the school science fair on February 4th.

Please ask your child to share with you the notes & information that they receive in class. Additional science fair information can be obtained on the school web site at www.greenville.k12.sc.us/taylorse/ .

Thank You,

Fourth Grade Teachers
