# ASSURANCES FOR SCHOOL PLAN 

(Mandated Component)

## Act 135 Assurances

Assurances, checked by the principal, attest that the district complies with all applicable Act 135 requirements.

## Academic Assistance, PreK-3

The district makes special efforts to assist children in PreK-3 who demonstrate a need for extra or alternative instructional attention (e.g., after-school homework help centers, individual tutoring, and group remediation).

## Academic Assistance, Grades 4-12

The district makes special efforts to assist children in grades 4-12 who demonstrate a need for extra or alternative instructional attention (e.g., after-school homework help centers, individual tutoring, and group remediation).

## Parent Involvement

The district encourages and assists parents in becoming more involved in their children's education. Some examples of parent involvement initiatives include making special efforts to meet with parents at times more convenient for them, providing parents with their child's individual test results and an interpretation of the results, providing parents with information on the district's curriculum and assessment program, providing frequent, two way communication between home and school, providing parents an opportunity to participate on decision making groups, designating space in schools for parents to access educational resource materials, including parent involvement expectations as part of the principal's and superintendent's evaluations, and providing parents with information pertaining to expectations held for them by the school system, such as ensuring attendance and punctuality of their children.

## Staff Development

The district provides staff development training for teachers and administrators in the teaching techniques and strategies needed to implement the school/district plan for the improvement of student academic performance. The staff development program reflects requirements of Act 135, the EAA, and the National Staff Development Council's revised Standards for Staff Development.

## Technology

The district integrates technology into professional development, curriculum development, and classroom instruction to improve teaching and learning.

## Innovation

The district uses innovation funds for innovative activities to improve student learning and accelerate the performance of all students. Provide a good example of the use of innovation funds.

The district (regardless of the grades served) collaborates with health and human services agencies (e.g., county health departments, social services departments, mental health departments, First Steps, and the family court system).

## Developmental Screening

The district ensures that the young child receives all services necessary for growth and development. Instruments are used to assess physical, social, emotional, linguistic, and cognitive developmental levels. This program normally is appropriate at primary and elementary schools, although screening efforts could take place at any location.

## Half-Day Child Development

The district provides half-day child development programs for four-year-olds (some districts fund fullday programs). The programs usually function at primary and elementary schools, although they may be housed at locations with other grade levels or completely separate from schools.

## Developmentally Appropriate Curriculum for PreK-3

The district ensures that the scope and sequence of the curriculum for PreK-3 are appropriate for the maturation levels of students. Instructional practices accommodate individual differences in maturation level and take into account the student's social and cultural context.

## Parenting and Family Literacy

The district provides a four component program that integrates all of the following activities: interactive literacy activities between parents and their children (Interactive Literacy Activities); training for parents regarding how to be the primary teachers for their children and full partners in the education of their children (parenting skills for adults, parent education); parent literacy training that leads to economic selfsufficiency (adult education); and an age-appropriated education to prepare children for success in school and life experiences (early childhood education). Family Literacy is not grade specific, but generally is most appropriate for parents of children at the primary and elementary school levels and below, and for secondary school students who are parents. Family Literacy program goals are to strengthen parent involvement in the learning process of preschool children ages birth through five years; promote school readiness of preschool children; offer parents special opportunities to improve their literacy skills and education, a chance to recover from dropping out of school; and identify potential developmental delays in preschool children by offering developmental screening.

## Recruitment

The district makes special and intensive efforts to recruit and give priority to serving those parents or guardians of children, ages birth through five years, who are considered at-risk of school failure. "At-risk children are defined as those whose school readiness is jeopardized by any of, but no limited to, the following personal or family situation(s): Educational level of parent below high school graduation, poverty, limited English proficiency, significant developmental delays, instability or inadequate basic capacity within the home and/or family, poor health (physical, mental, emotional) and/or child abuse and neglect.

## Coordination of Act 135 Initiatives with Other Federal, State, and District Programs

The district ensures as much program effectiveness as possible by developing a district-wide/school-wide coordinated effort among all programs and funding. Act 135 initiatives are coordinated with programs such as Head Start, First Steps, Title I, and programs for students with disabilities.

## Introduction

Sterling School is home to two programs: Sterling elementary, serving 611 students 4K-5th grades, and the Charles Townes Center, a select program for 445 highly gifted students (grades $3-8$ ). The programs operate within a single school and will be guided by unified beliefs, vision and mission.

The School Improvement Council (SIC) and teaching staff have worked this year to identify key areas in which Sterling School should spend time and energy advancing itself over the next five years. Teachers worked in grade level teams based on the following grade levels: early childhood, elementary and middle school. The teachers and School Improvement Council reviewed test scores data, ADVANCED Ed survey data and completed the Advanced Ed self-assessment. The data and charts were reviewed and compiled in the current Strategic Plan.

## Executive Summary

Over several sessions the SIC developed a list of items indicative of the current culture, as well as the culture that we want to see develop and flourish at Sterling School. This list of items fit into two key focuses: experiential learning and inclusiveness.

The SIC agreed that the best approach to encourage this vision of school culture is to update and improve the instructional program at the Charles Townes Center and the Sterling elementary program by adding depth, rigor and choice to current offerings. This approach combines the two areas of focus. We are working more closely with students to include them in the designation of the types of experiential learning from which they can choose. There is still a path for course acceleration when needed; however, the vast majority of student needs can be better met with a program that adds attention to student strengths through extended lessons, in-depth studies in a field of interest and ongoing enrichment. We further expand the idea of inclusiveness by having teachers, parents and students work together to develop comprehensive student portfolios which will guide large group extensions, individualized enrichment and student course and project selections. The Strategic plan has specific goals and strategies outlined in the plan are set forth with the purpose of attaining a school culture built around experiential learning and inclusiveness. This plan consists of three goal areas with each having measurable performance goals aligned to national and state guidelines for performance.

## Student Achievement:

Goal Area 1 encompasses performance goals for Reading, Writing and Math, Social Studies and Science. These performance targets are based on the prior years' PASS scores and are focused on areas needing improvement. Within the plan found in this document, interim performance goals further target additional areas of improvement. You may notice in this goal area that Sterling elementary is designated rather than Sterling School. Sterling elementary indicates elementary students in grades $3^{\text {rd }}-5^{\text {th }}$ not in the Charles Townes Center. This designation is due to the extremely high number of Charles Townes students who score exemplary in English Language Arts, Writing and Math.

## Needs:

- The Sterling elementary program performed above federal standard however the AfricanAmerican sub group was below standard
- Assessment: Use of common assessments and analysis of other data.
- Balanced Literacy: Need to improve literacy skills on \%K-5 ${ }^{\text {th }}$
- Curriculum: Integrate review standards and improved current instructional unit plans and rigor of all academic areas.
- CATCH: Need to continue strategies to improve student health and academic performance
- Differentiation: Need to more effectively use research based instructional practices to individualize student learning and performance
- Enrichment: Continue to Extend, Enrich and Accelerate student learning and performance.

## Teacher and Administrator Quality

Goal Area 2 addresses the need for quality staff. The Sterling School vision requires extensive training for teachers and staff members. This area defines the school-wide professional development for the year as well.

## Needs:

- Provide more targeted professional development
- Use of CATCH activities to impact student health and learning.
- Training in the development, analysis and use of assessment data.
- Improved student literacy through balanced literacy
- Strategies for differentiation.
- Use of technology to improve student learning

The goals in this area are supported by national and state guidelines defining quality personnel. The strategies in this area are designed to support the two areas of focus in developing the school culture and are integral to implementing the strategies in Goal Areas 1 and 3.

## School Climate:

Goal Area 3 addresses school climate. This goal area is very important at Sterling School and is directly aligned with the focus of inclusiveness. Sterling School is a diverse school covering a wide range of ages and student needs. Sterling School plays a critical role in the local community as well creates a community for our parents from around the county. The strategies for meeting and maintaining this goal are designed to identify and meet the needs of this diverse population.

## Needs

- Improve student attendance and tardies
- Parent engagement- need parent workshops, orientations and meetings to help provide support for students
- Improve parent-teacher conferences using more parent friendly assessment data
- Diversity training for parent leadership- SIC \& PTA
- Each student needs one adult in the school they feel knows and advocates for them.

## Challenges

Sterling School has been building the school and both programs since 2003. This is the fifth year that both programs have been complete. The Charles Townes program is thirteen years old and is in the process of renewal, while the Sterling program is looking at its instructional units and reviewing their initial effectiveness. The school has been working on developing and refining the curriculum based on ongoing data collection and strategic planning.

## Accomplishments:

During the past five years, Sterling School has made significant progress. Professional development funds and school resources have been spent with school goals and objectives as key criteria. The school staff, PTA and School Improvement Council has been involved in the review and assessment of the Strategic Plan. We continue to make progress in addressing deficiencies and needs by implementing the Gifted Program and successfully developing the Sterling Elementary Program in grades 4K-5. In 2011, 2012, 2013 and 2014, Sterling School received the Gold Award for General Academic Performance and the Silver Award for Closing the Achievement Gap.

## Other Accomplishments

- National Board Certified Teachers
- Teachers Gifted and Talented Endorsed
- Presenters at National Association of Gifted Children \& National Teachers of English
- State Winners: National History Day
- Math Counts - Upstate Champions 2010, 2011, 2012, 2013, 2014, 2015, 2016

State Champions 2014, 2015

- Gold Award
- Green Steps School
- Top Ten Teacher of the Years -
- Jennifer Johnston 2009
- Emily Johnson 2010
- Linda Reynolds 2011
- Sara Newell 2012
- John Burdick 2014
- Greenville County Science Teacher of the Year John Burdick 2010-2011 Tracey Carney 2012-2013
- Battle of the Books Runner-up 2011-2012
- Silver Level - Safe Routes to School
- LiveWell Greenville Healthy School Award 2012-2013, 2013-2014, 2014-2015

## School Profile

Sterling School is home to two programs: Sterling elementary, serving 611 students 4K-5th grades, and the Charles Townes Center, a select program for 445 highly gifted students (grades 3-8). The programs operate within a single school and will be guided by unified beliefs, vision and mission.

The uniqueness of each program is based in large part to the manner in which we modify the content, process, product, and learning environment in order to meet the specific needs of each child. Skills related to student collaboration and teamwork are delivered by means of "hands-on, inquiry-based instruction, integration of the arts, and intense focus on research and utilization of technology. Resources are shared between programs and all students are offered opportunities to engage, challenge, and mentor each other in a manner that will be culturally/personally affirming and academically rich. We create a sense of community where each individual knows that he or she is respected and valued.

The programs take advantage of the opportunity to experience education at its highest level. By participating in a joint endeavor, all members of Sterling School will deepen their understanding of issues, which influence our community and country and will gain perspective regarding the diversity that characterizes our world. Additionally, there are frequent opportunities for students to contribute to the exchange of ideas and knowledge within and beyond their learning community. Beyond the academic statistics, it is the hope of the parents and community that all students will learn how to be leaders of their own lives and will reach their true potential.

## Information and Analysis

School Profile 2015-2016
Instructional and Organizational Effectiveness

The Sterling Elementary Program student body is composed of $59 \%$ from the First Choice attendance area (up from $52 \%$ the prior year) and $41 \%$ Special Permission (down from 48\%).

The Charles Townes Center student population is stable. Student attendance rates at Sterling School have remained steady over the past few years with less than $2 \%$ turnover. Sterling School has an average daily attendance rate of 98 percent.

| Sterling School Attendance Rate 2009-2013 |  |  |  |
| :---: | :---: | :---: | :---: |
| $2009-2010$ | $2010-2011$ | $2011-2012$ | $2013-2014$ |
| $97.3 \%$ | $99.3 \%$ | $97.5 \%$ | $97.86 \%$ |

## Sterling School Staff

Sterling School boasts a dynamic faculty and staff. There are 54 teachers in grades 4 K through 8. We have three guidance counselors, an instructional coach, two full-time Spanish
teachers, an Enrichment Facilitator, Administrative Assistant and an Assistant Principal. We benefit from having full-time related arts staff in the areas of art, music, and physical education. Sixty-one percent of teachers hold Masters' degrees. All Charles Townes Center teachers are certified to teach gifted students.

Additional personnel include the school secretary, attendance clerk, and guidance clerk and school nurse. We have two 4 K aides and two 5 K aides. The custodial staff includes a plant engineer and five full-time custodians. The cafeteria staff includes a cafeteria manager and five additional food service personnel.

## Administration:

| Principal: David M. Johnstone | 2005-Current |
| :--- | :--- |
| College of Charleston 1990 | Bachelors of Science -Special Education |
| Clemson University 1996 | Masters in Education - Administration |
| 1996 Assistant Principal | Fountain Inn Elementary |
| 1997-2005 Principal | Fork Shoals School (IB World School) |
| 2005 TIAA CREF Principal of the Year |  |
| 2013-2014 South Carolina Arts Education Association Principal of the Year |  |

Assistant Principal: Loretta Holmes 2012-Current
Administrative Assistant: Natalie Pough 2014-Current

## Parent Involvement/Learning Climate

Parental involvement is encouraged through school communities and councils. Through collaborative efforts, parents assist with homework and encourage and honor their child's successes. Parent volunteers have logged thousands of hours; they help make copies, tutor students, and help with clubs and after school programs. Sterling School has an extremely involved PTA and School Improvement Council.

## Philosophy

All students have a right to educational experiences that are engaging, worthwhile and that enable them to develop unique gifts, pursue natural talents and interests, and become motivated, lifelong learners. Parents, teachers, and administrators at Sterling School work cooperatively and share the responsibility to provide advanced learning opportunities at school and at home these opportunities teach students to communicate effectively, solve problems competently, think critically and creatively, and act responsibly.

## Counseling and Other Student Support Services

Students at Sterling School receive quality support services from an outstanding staff. Support personnel include 1.5 guidance counselors, a guidance clerk, an instructional coach, a media specialist, a speech pathologist, a resource teacher, and a related arts team in art, music, and physical education. The addition of an assistant principal and creation of a schoolwide Student Council and Mentoring Program have been instrumental in this area.

The guidance department at Sterling has a unique opportunity to overlay the Gifted Programming Standards from the National Association for Gifted Children with the South Carolina Guidance and Counseling Standards from the South Carolina State Department of Education. Recognizing the learning and developmental differences of all students, Sterling's counselors promote self-understanding, awareness, and both the cognitive and affective growth of our students. Counselors use the State Department's three broad student development areas of Learning to Learn, Learning to Live, and Learning to Work as the basis for Sterling's comprehensive program which incorporates classroom guidance lessons, small group guidance and counseling groups, and individual counseling sessions. Through a vertical articulation process, the counselors ensure that the Gifted Standards are infused throughout the entire spectrum of the guidance program.

## After-School Program

Sterling School supports students through a number of after-school programs. There is a daily after-school program that provides homework help and academic support for 60 students each day. This is a fee-based program. There are also after-school enrichment programs such as: Running Club, Creative Writing Club, Film Club, Youth in Government, Beta Club, Lego Robotics, Speech and other activities to help students receive an array of integrated learning.

## Instructional and Organizational Effectiveness:

## Primary Educational Models:

Sterling School has a strong academic tradition. With the growth of the Charles Townes Center and an array of leaders, emphasis on instructional models has varied. Regardless of the variety of approaches, academic achievement has improved every year of the school's existence. Improvement spans grade levels, cohort grade level groups of students and comparisons to gifted students across the district. These models are also being used to develop the inquiry-based program of the Sterling ElementaryProgram.

## Educational Models Used:

- Renzulli - The Enrichment Triad (scaffolding), focusing on Type III activities
- William and Mary Units
- Bloom's Revised Taxonomy
- Gardner \& Taylor - Multiple Intelligences \& Talents
- Cooperative Learning
- Inquiry-based education
- M3: Math Curriculum ( $3^{\text {rd }}-5^{\text {th }}$ Grade)

## Primary Assessment Tools:

- Rubrics to assess writing and performance
- Teacher Observations
- $\quad$ Self and peer evaluations/reflections by students
- Teacher-student conferencing
- Anecdotal records
- Individual writing portfolios with annual goals-based conferences
- Performance assessment

Sterling School uses the South Carolina State and Greenville County District Academic Standards as foundations to build integrated, inquiry/problem-based units of instruction. In English Language Arts, students are taught through a balanced literacy model, which includes reading, writing, spelling and independent reading. English Lanuage Arts is closely tied with Social Studies through the use of integrated units. Students read historical fiction and use the content, skills and strategies to synthesize information in order to apply new knowledge to other areas. In Science, the students use the District-provided science kits to develop a strong understanding of the science process skills. Students actively research and apply these skills through the use of scientific journals, written lab reports, science fair projects and research projects.

## English Language Arts:

Students benefit from an enriched language arts curriculum which includes creative, challenging, and developmentally appropriate skills in language usage, writing, integration of social studies and literature-based instruction culminating in authentic learning experiences. Each grade level strives to use innovative and active learning techniques that enhance student learning, while complementing and extending skills and knowledge previously acquired. Teachers work collaboratively on a regular basis and utilize shared information taken from individual learning styles, multiple intelligences, and learning profiles to best teach to each student's strengths. The department designs and extends lessons and units based on the state ELA Standards. In middle grades, student preparation to excel in rigorous high school coursework is a focus.

## Reading:

Strengths:
© Most students read on or above grade level (CTC)
(C) Response to Intervention Program for struggling readers ( $\left.5 \mathrm{~K}-2^{\text {nd }}\right)(+2011)$
(C) Differentiated reading groups to serve varied student abilites. (+2011)

## Writing:

## Strengths:

(C) Good base knowledge
(C) Proficiency in creative writing (CTC)
(e) Vertically articulate the writing process (+2011)
(c) Scaffolding for reluctant writers

## Spelling, Grammar, and Capitalization:

Strengths:
© Good base knowledge
© Able to write complete sentences (CTC)
© Word Walls and vocabulary displayed in all grades
© Rigorous grammar instruction through vertical articulation (CTC)
© Teachers modle the wiritng process

## Reading Comprehension:

Strengths:
© Most students read on or above grade level (CTC)
© Shared reading includes a variety of genres and topics

## Math:

The math curricula at Sterling School are designed to promote problem solving skills which can be utilized across all curriculum areas, including the related arts. Problem solving is collaborative and real world applications demonstrate relevance to students. Rigor is provided through vertical articulation, higher level thinking skills, as well as fluidity in class placement. Students are expected to demonstrate appropriate levels of accuracy based on developmental levels and the task at hand.

## Strengths:

(e) Strong problem solving abilities
(C) Stretch to abstract concepts
(C) Desire to learn
(c) Solid understanding of basic concepts
(C) Differentiated instruction
© Use of a variety of instructional strategies (best practices)
(e) Integration of technology
© Utilization of manipulatives

## Science:

Inquiry-based learning is the cornerstone of the science curricula at Sterling School. Handson science experiences are practiced in both the classroom and science lab settings. Students participate in research projects, lab experiments, and the technological design process for which teachers hold high expectations of accuracy and understanding. Real world application opportunities are provided through experiences such as the Districtsponsored Science Fair and Invention Convention. Students are also expected to show a comprehensive knowledge of science content as well. Integration across the curriculum is an important aspect of the science curricula.

Vertical articulation, higher-level questioning and thinking skills, expert speakers, independent labs, and technological aids promote a rigorous science experience at Sterling School.

## Strengths:

(C) Strong technology backgrounds
(e) Students are creative thinkers, problem solvers
(C) Ability to differentiate lessons for a variety of student abilities and interests
(e) High interest in reading non-fiction material.
(e) Inquiry based learning.

## Social Studies:(2011)

The Social Studies curricula at Sterling School are founded on state and district standards and focus on three important education models. First, students are expected to solve inquiry-based problems. Second, teachers utilize a variety of mediums to present to and provide experiences for students in the Inter-related Arts model. Mediums include drama, writing, collage, painting, sculpture, pottery and music. Third, students experience cultural, economic, governmental, and societal differences between cultures with the simulation model. Within these models, technology and writing skills are integrated as students conduct research and create authentic assessments. Reading is emphasized in both the genres of fiction and nonfiction through independent reading as well as literature circles. Students apply these skills through extensive research reports, National History Day projects, and other inquiry-based projects.

## Strengths:

(C) Strong reading comprehension skills
(C) Critical thinking
(C) Thinking from multiple perspectives
(C) Guest speakers and historical presentations are used to enhance the curriculum
(C) Content is integrated well with other curriculum areas and arts
(e) Real world application

## Modern Languages Program: (Spanish)

The Modern Languages Program at Sterling School offers articulated instruction in Spanish to all third through eight grade students. All levels of modern language instruction support national and state standards for modern languages. The curricula are made up of thematic units designed to address the " 5 C's": Culture, Comparisons, Connections, Communication, and Communities. Each unit ends with an integrated performance assessment (IPA) which addresses the three components of the Communication standard: the Interpersonal, Presentational and Interpretive modes.

The elementary program provides content-based instruction one day per week for a total of 50 minutes in the target language. All instruction is conducted in the target language.

The middle school program provides Spanish I and Spanish II for high school credit in $7^{\text {th }}$ and $8^{\text {th }}$ grades, while the $6^{\text {th }}$ grade curriculum supports and prepares students for this transition. Students in the $7^{\text {th }}$ and $8^{\text {th }}$ grades attend Spanish daily for both semesters as part of their core classes.

## Strengths:

(©) Daily exposure to the target language
(C) Demonstrations of perseverance and courage
(C) Curricula follow national and state standards
(C) Use of backwards design
(C) Vertical articulation

## Media Center:

The purpose of the library media program is to ensure that students and teachers can locate, evaluate and use information effectively. The library media specialist and classroom teacher collaborate to teach information and media literacy skills to students in the context of their classroom instruction and at the point of instructional need. The library media center provides programs and access to information in a variety of formats to foster a love of reading and create lifelong learners who are able to use their information skills to pursue their personal and academic interests.

## Media Center Usage Statistics:

| Media Center Activity Summary | $2009-2010$ | $2010-2011$ | $2011-2012$ |
| :--- | :---: | :---: | :---: |
| Percentage of class use | $22 \%$ | $57 \%$ | $61.40 \%$ |
| Average daily walk-in traffic | 436 | 412 | 797 |
| Total number of material circulations | 22,445 | 27,079 | 25,938 |
| Total number of student circulations | 18,425 | 18,922 | 19,130 |
| Average per pupil yearly circulation | 30.2 | 25 | 21.3 |
| Ending average collection age | 2003 | 2003 | 2004 |
| Percentage of yearly collection renewal | $5.8 \%$ | $7.2 \%$ | $5.58 \%$ |

## Suggested Program Improvements (from teacher and student surveys)

Teachers would like to get into the library more easily because they want access to the faster computers here. They also stated that the professional library did not meet their needs and that the media specialist could offer more useful professional development. The number of responses stating that the teachers do not collaborate with other teachers on their instructional units is higher than I expected; however, none of the questions asked if teachers would like to collaborate more with the media specialist making it difficult to tell if teachers perceive this as a problem. The number of negative responses to the question about incorporating literacy instruction and reading promotion within the classroom curriculum is a concern.

## Strengths:

(c) High interest in reading
(e) Teachers and students afforded a diverse range of media and technology
(C) The library media center is an open and friendly environment for students and staff to meet their personal and academic needs.

Plan:
(C) Appropriate young adult fiction and nonfiction that fits the student's curricular needs will be addressed through collection development.
(C) The library teacher will conduct more media literacy lessons and events
(C) The library teacher will create more events based on socialization, book talks, reading and will incorporate gaming.
(C) A technology committee will form within the school to address technology issues and open communication about the effective use of technology.

## Music:

## Singing and Playing

Using conventional and non-conventional music reading, students use their voices expressively as they speak, chant, and sing. They sing a variety of simple songs in various keys, meters, and genres, alone and with a group, becoming increasingly accurate in rhythm and pitch.

Students learn tecniques to properly play their chosen instrument and master it through the disciplines of personal practice and participation in group instrumental settings.

## Creating Music

Students improvise songs to accompany activities. They improvise instrumental accompaniments to songs, recorded selections, stories, poems, and create short pieces of music, using voices, instruments, and other sound sources. Students invent and use original graphic or symbolic systems to represent vocal and instrumental sounds and musical ideas.

## Responding To Music

Students identify the sources of a wide variety of sounds. They respond through movement to music of various tempos, meters, dynamics, modes, genres, and styles to express what they hear and feel in works of music. Students are given many opportunities to participate freely in music activities.

## Understanding Music

Students use their own vocabulary and standard music vocabulary to describe voices, instruments, music notation, and music of various genres, styles, and periods from diverse cultures. They sing, play instruments, move, and verbalize to demonstrate awareness of the elements of music and changes in their usage. Students are able to demonstrate an awareness of music as a part of daily life.

## Arts Integration:

Arts integration would not be possible in the absence of a strong "Arts for Art's Sake" program. Arts integration naturally allows students with strengths in the arts to take leadership roles. The areas of perserverance, courage and creativity are directly tapped by arts integration.

## Strengths:

(C) Strong arts program
(C) Arts specialists have extensive training in Arts Integration
(C) Some success in implementing integrated units
(C) Three grade levels \& related arts have had Arts Integration training; (SmartArts)
(C) Strong parent support

## Visual Arts:

## Strengths:

(C) Out -of- the- box approach
(©) Interesting materials
(e) School-wide focus on art
© Integration with classroom teachers
(C) Focus on Thinking Ideas behind art
(e) Focus on art history and contemporary artists
@-Reallife art applications-(2011)

## Physical Education:

## Strengths:

(e) Variety of content
(C) Integration with classroom teachers
© Assisting in incorporation of movement strategies in the regular classroom
(C) Students willing to try new things
(c) Strong parent support
(C) Focus on student leadership and character education

## Technology:

## STRATEGIC VISION for TECHNOLOGY

From The National Education Technology Plan 2010 (NETP) - U.S. Department of Education. Available online at
http://www.ed.gov/technology/netp-2010.
The challenge for our education system is to leverage the learning sciences and modern technology to create engaging, relevant, and personalized learning experiences for all learners that mirror students' daily lives and the reality of their futures.

Technology should be leveraged to provide access to more learning resources than are available in classrooms and connections to a wider set of "educators," including teachers, parents, experts, and
mentors outside the classroom. It also should be used to enable 24/7 and lifelong learning.

Whether the domain is English language arts, mathematics, sciences, social studies, history, art, or music, 21st-century competencies and such expertise as critical thinking, complex problem solving, collaboration, and multimedia communication should be woven into all content areas. These competencies are necessary to become expert learners, which we all must be if we are to adapt to our rapidly changing world over the course of our lives.

In a connected teaching model, classroom educators are fully connected to learning data and tools for using the data; to content, resources, and systems that empower them to create, manage, and assess engaging and relevant learning experiences; and directly to their students in support of learning both in and out of school.

## To reach this vision, we must:

- Expand opportunities for educators to have access to technology-based content, resources, and tools where and when they need them.
- Provide access to technology-based resources that inspire educators to provide more engaging and effective learning opportunities for each student.
- Provide ... in-service...with professional learning experiences powered by technology to increase [educators'] digital literacy and enable them to create compelling assignments for students that improve learning, assessment, and instructional practices.
- Ensure that every student and educator has at least one Internet access device and appropriate software and resources for research, communication, multimedia content creation, and collaboration for use in and out of school.

## Current data on the use of educational and information technology in our system consists of records of purchases and numbers of computers and Internet connections. Only by shifting our focus to collecting data on how and when technology is used will we be able to determine the difference it makes and use that knowledge to improve outcomes and the productivity of our education system.

Our hope is that Sterling's teachers will experiment with such resources as online learning, online tutoring and mentoring, games, cognitive tutors, immersive environments, and participatory communities and social networks both within and across education institutions to give students guidance and information about their own learning progress and strategies for seamless completion of a comprehensive $\mathrm{P}-16$ education.

## We include three categories:

- information literacy, the ability to identify, retrieve, evaluate, and use information for a variety of purposes;
- media literacy, the ability to consume and understand media, as well as communicate effectively using a variety of media types;
- and digital citizenship, the ability to evaluate and use technologies appropriately, behave in socially acceptable ways within online communities, and develop a healthy understanding of issues surrounding online privacy and safety.

Answers to questions about 21st-century learning also must take into account that people no longer can learn everything there is to know in a lifetime, and the economic reality is that most people will change jobs throughout their lives. Therefore, we need adaptive learning skills that blend content knowledge with the ability to learn new things.

## Items we must address as a school and a district:

Low-income and minority learners. [Students who are]... less likely to have computers and Internet access and have fewer people in their social circles with the skills to support technology-based learning at home.

Potential Solution(s): extended hours for use of networked computers in schools, libraries, community centers, etc., 1 to 1 computing equipment accessible for home use. Allow use of devices owned by the student or family, owned by the school, or some combination of the two. The use of devices owned by students will require advances in network filtering and improved support systems.

Early childhood: To keep pace with their peers, these children especially need intervention that augments the linguistic, visual, and symbolic worlds that learners experience and seek to emulate.

Solution(s): Computer-based activities and resources
Broadband: "Adequate" means enough bandwidth to support simultaneous use by all students and educators anywhere in the building and the surrounding campus to routinely use the Web, multimedia, and collaboration software.

## Accessible Devices for Every Student and Educator

Because an infrastructure for learning should support learning in and out of the classroom, students and educators need Internet-access devices for around-the-clock use from any location. Internet access devices are continually evolving and today include desktop computers, laptops, net books, public access kiosks, mobile phones, portable digital players, and wireless readers.

In the past, districts were reluctant to allow students to use their own devices in school because of concerns about the unfair advantage of affluent students who are more likely to have the latest devices and the risk of students accessing inappropriate Internet content or using their connectivity to cheat on tests. However, districts are finding that a combination of acceptable use policies and staff training makes student use of personal digital devices both feasible and safe. Purchasing devices for students who need such financial support is more cost-effective than purchasing devices for every student. Districts can think about providing an access device and Internet access at home for those students who need them in the same way they provide a free or reduced-price hot lunch for students who could not otherwise afford it. In choosing the devices to provide for students who otherwise would not have them, districts need to make sure that all their students have devices that support writing, analysis, and the creation of digital content related to their courses, not just consumption of content created by others.

We at Sterling School support the creation of an acceptable-use policy that would allow students to use personal cell phones and other computing devices in school.

We understand that each educator should have a discussion with his or her students to set ground rules for
usage.

We agree that

- Cell phones could be used in class for working on assignments only.
- Text or video should be sent only with the educator's permission.
- No photographing or video- or audio-recording of people is to be allowed without their permission.
- No posting to websites is to be allowed without permission,
- Online safety precautions are to be taken when publishing from a mobile phone.

Technology ideas: Teachers could use cell phone applications for polling and to set up an online text messaging board to discuss homework. Teachers could use cell phones while teaching, asking students to answer questions via text messaging rather than out loud. As student answers came in, they were displayed on a screen at the front of the class, identified by the student's cell phone screen name. English teachers, in particular, found the cell phones useful as they started using blogs to engage students in writing. One class used Twitter to collaborate in generating stories in class.

## Specific examples of individual and collaborative learning with technology may include the following:

- Inquiry and adventure environments with games and activities that foster learning.
- Online "collaboratories" (National Science Foundation 2008a) in which scientists establish protocols for collecting data with sensors from local environments across the planet. Learners and teachers learn science by doing science as they capture, upload, and then visualize and analyze geospatial and temporal data patterns from the data contributed by the globally networked community.
- Earth- and sky-mapping Web resources with data from the sciences and other fields of scholarly inquiry that anyone can use to develop virtual travel tours to be applied in learning and teaching activities.
- Augmented reality platforms and games that bring locally relevant learning resources into view for users of mobile devices with a GPS (Johnson et al. 2010).
- Use of the power of collective intelligence and crowd sourcing to tackle complex interdisciplinary problems.

## - Powerful learning applications for mobile Internet access devices, such as musical instrument simulators, language-learning tools, and mathematical games.

## Student Support Systems

Recognizing that some students need support beyond that which is available in the classroom, Sterling School has developed, with the District, a variety of special services:

- We have one part-time special education resource teacher who works with students with learning disabilities.
- We have a part-time audiologist who teaches speech and language skills to students with those areas of difficulty.

When a teacher determines that a student has a need requiring special attention, the student is referred to the A- Team Child Assistance Team. The purpose of the team referral is three fold:

- To assist and advise the regular classroom teacher of potential interventions.
- To recommend screening for possible areas of difficulty.
- If needed, to recommend formal testing of student for a disability.

## Certified Staff Evaluation Measures

Principal: Performance Assessment System for Administrators (PAS-A)
Greenville County Schools' Performance Assessment System for Administrators (PAS-A) is a process for collecting and presenting data to document performance that is based on well-defined job expectations. PAS-A is a modified form of the South Carolina Assisting, Developing, and Evaluating Principal Performance (ADEPP) requirements.

## Instructional Coach: Performance Assessment System for Instructional Coaches (PAS-IC)

Greenville County Schools' Performance Assessment System for Instructional Coaches (PAS-IC) is also a process for collecting and presenting data to document performance that is based on welldefined job expectations.

## Teachers Performance Assessment System for Teachers (PAS-T)

Greenville County Schools' Performance Assessment System for Teachers (PAS-T) is a process for collecting and presenting data to document performance that is based on well-defined job expectations. PAS-T is a modified form of the South Carolina ADEPT requirements.

## Leadership

## School Improvement Council

Composed of parents and teachers, the Council meets monthly and meetings are open to the public. The meeting times are posted in the parent handbook and are found in monthly parent updates. The principal serves as an ex-officio member.

Each member of the committee has been part of a sub-committee whose job is to evaluate and review the progress of the School Improvement Plan. Each meeting, committees report their findings, answer follow-up questions and then set actions for the next meeting. The committee also completes the annual School Report to the Community.

The purposes of the Council are:

1. To gain knowledge concerning the purpose and goals of the school.
2. To disseminate information to other parents and citizens within the community and to clarify information concerning the school programs.
3. To offer for consideration to the school principal suggestions concerning program improvements with Respect to student needs and program operation within the individual school, area, or district.
4. To assist in the preparation of the Annual School reports as required by the School Finance Act of 1977 and ACT 135 of 1993.

## School Based Leadership

At the school level, the Principal, Assistant Principal, Guidance Counselor, and Instructional Coach meet on a weekly basis to review the progress made in the budget, instructional needs, and for communication about and the scheduling of activities. Teachers plan collaboratively in weekly meetings and vertical meetings are held across grade levels based on curriculum areas.

## Partnerships

Sterling has developed a robust partnership plan through the goals of the Strategic Plan. The plan is carried out by the guidance department in coordination with PTA. Partners and activities are summarized below.

| Business/organization |  |  |  |
| :---: | :---: | :---: | :---: |
| Mice On Main | Service | Papa John's | Donation |
| Bob Jones University Press | Service | Fisher Law Firm | Service |

## Mission, Values and Beliefs

## Mission

Provide a differentiated; challenging education to meet the distinctive intellectual, social and emotional needs of our students

## Vision

Nurtured by a supportive environment, students will surpass academic challenges, develop as leaders, form collaborative relationships with peers and learn to lead. Our graduates will be independent, productive, responsible and creative individuals capable of making original contributions to society.

## Beliefs:

To support a first-rate education for our students, we believe the following:

- Students of exceptionally high intellectual potential do not simply learn faster, they often learn in a qualitatively different way; they deserve appropriate rigor, complexity, and depth in what they learn, as well as opportunities to demonstrate significant academic and intellectual growth.
- Fostering a love of learning is a shared enterprise among home, school, community and student, and we will communicate openly and work together to support the intellectual curiosity and active participation by students in managing their learning.
- Students obtain personal academic growth through self-evaluation of their approach to learning.
- Compassion, courage, creativity, perseverance, integrity and aspiration are essential leadership skills.
- Students deserve opportunities for service, leadership, appreciation of cultural diversity, creative expression, and activities that enrich their learning.

## Data Analysis and Needs Assessment

## Student Achievement Needs Assessment

Sterling School relies on test scores from the PASS, MAP tests, Cognitive Abilities Test and the lowa Basic Skills Test to assess student achievement. Setting the highest achievement expectations for students, we are committed to meeting Adequate Yearly Progress standards set by NCLB guidelines. We strive to continually improve student performance on standardized tests. We also use MAP testing to measure student progress over time.

## ITBS

| ITBS: Historical |  |  |  |  |
| :--- | :--- | :--- | :---: | :---: |
|  |  | 2nd <br> 2nd | 2nd <br> 2013 | 2nd <br> 2014 |
| 2nd |  |  |  |  |
| 2015 |  |  |  |  |$|$

The $2^{\text {nd }}$ grade scores are Sterling Elementary students. The achievement levels are level or better than the CogAT percentiles. In 2011, the district limited the sections administered to math and reading. Reading comprehension continues to be strong. Math scores lag reading, however this pattern is found district wide as well.

## PASS

PASS is South Carolina's statewide assessment based on the Academic State Standards. The PASS test classifies students into 3 areas: Exemplary, Proficient, and Not Met. Most students score in the proficient and exemplary levels. The PASS scores noted for the Charles Townes Center below show the percentage of students scoring in the Exemplary category. The Sterling Elementary scores are shown by scoring category. The data is also disaggregated by race for the Sterling elementary program.

## School Climate Needs Assessment

Since the inception of Sterling School several surveys conducted by the School Improvement Council, the District and the state have been completed including the Advanced Ed Surveys provided to students, teachers and parents. The survey assessed many areas, including satisfaction level, and perceived weaknesses. The survey is currently being evaluated and reviewed by teachers as well as the School Improvement Council to be used in developing key action steps. Teachers also give surveys to all of their students. These surveys have been collected and analyzed by the teacher as part of their annual review and five-year formal evaluation.

## Advanced Ed Teacher Survey \& Principal's Survey <br> State Report Card Survey Data

The Advanced Ed survey was completed by all staff members. Thi ssuervey is only given every five years. After the results were compiled, teachers and the School Improvement Council reviewed the results. The Teacher Survey was extremely positive with each category showing 90\% Agree and Strongly Agree in most categories. The Strongest areas were Purpose and Direction and Continuous Improvement. There were very few disagrees on any category. Weaknesses were relative.

The Prinicpal's Survey is give to teachers annually as part if the principal evaluation system. The areas of questions in the Prinicpal's Survey centered on the performance of the principal. Among the strongest areas noted were communication of the mission and vision of the school, a safe school environment, use of data to make decisions, and general instructional support.

The State Report Card Survey is administered to all teachers and studnets and parents of $5^{\text {th }}$ and $8^{\text {th }}$ graders. The data is sent back to the school sand portions are used on the school report card.

## Summary of Needs

## Student Achievement:

Goal Area 1 encompasses performance goals for Reading, Writing and Math, Social Studies and Science. These performance targets are based on the prior years' PASS scores and are focused on areas needing improvement. Within the plan found in this document, interim performance goals further target additional areas of improvement. You may notice in this goal area that Sterling elementary is designated rather than Sterling School. Sterling elementary indicates elementary students in grades $3^{\text {rd }}-5{ }^{\text {th }}$ not in the Charles Townes Center. This designation is due to the extremely high number of Charles Townes students who score exemplary in English Language Arts, Writing and Math.

Needs:

- The Sterling elementary program performed above federal standard however the AfricanAmerican sub group was below standard
- Assessment: Use of common assessments and analysis of other data.
- Balanced Literacy: Need to improve literacy skills on \%K-5 ${ }^{\text {th }}$
- Curriculum: Integrate common core standards and improved current instructional unit plans and rigor of all academic areas.
- CATCH: Need to continue strategies to improve student health and academic performance
- Differentiation: Need to more effectively use research based instructional practices to individualize student learning and performance
- Enrichment: Continue to Extend, Enrich and Accelerate student learning and performance.

## Teacher and Administrator Quality

Goal Area 2 addresses the need for quality staff. The Sterling School vision requires extensive training for teachers and staff members. This area defines the school-wide professional development for the year as well.

## Needs:

- Provide more targeted professional development
- Training on Common Core
- Use of CATCH activities to impact student health and learning
- Training in the development, analysis and use of assessment data.
- Improved student literacy through balanced literacy
- Strategies for differentiation.
- Use of technology to improve student learning

The goals in this area are supported by national and state guidelines defining quality personnel. The strategies in this area are designed to support the two areas of focus in developing the school culture and are integral to implementing the strategies in Goal Areas 1 and 3.

## School Climate:

Goal Area 3 addresses school climate. This goal area is very important at Sterling School and is directly aligned with the focus of inclusiveness. Sterling School is a diverse school covering a wide range of ages and student needs. Sterling School plays a critical role in the local community as well creates a community for our parents from around the county. The strategies for meeting and maintaining this goal are designed to identify and meet the needs of this diverse population.

Needs

- Improve student attendance and tardies.
- School security- student ID's for middle school.
- Parent engagement- need parent workshops, orientations and meetings to help provide support for students
- Improve parent-teacher conferences using more parent friendly assessment data
- Diversity training for parent leadership- SIC \& PTA
- Each student needs one adult in the school they feel knows and advocates for them

A table of current needs was established to build support and strength in our core academic program. This table of needs is used to establish key strategies in the action plan,teacher professional and student achievement goals and tasked items for action by curriculum and program committees, Parent Teacher Association and School Improvement Council.

Each year, as items or addressed or deemed to be completed, those items will be noted in the table via notation and date of completion. New items will be added as needed and dated as well. Where items are program specific, program notation is also provided.

Identified needs are being addressed through multiple methods:

1. A Strategic Action Plan has been developed for major focuses for the school year.
2. Curriculum Vertical (cross grade level) Teams and Program Committees will be responsible for tasks in the plan and addressing other issues.
3. Indiviudal teachers may include needs in their professional goal setting yearly.

As new needs are discovered, they will be added and dated to the needs list. As needs are resolved, they will be dated and marked as complete.

Sterling also finished a comprehensive review of our overall instructional progarm and after careful review, we decided that the best approach to update and improve the instructional program at the Charles Townes Center and the Sterling Program was to add depth, rigor and choice to our current offerings. There is still a path for course acceleration where needed, however, the vast majority of student needs would be better met with a program that added attention to student strengths through extensions, in-depth studies in a field of interest and ongoing enrichment. These enrichments and extensions would also be supported through a partnership with The Children's Museum of the Upstate (in initial talks). Students would use the museum and its staff as a resource for curriculum development and field experiences. Teachers, parents and students will work together to develop a comprehensive student portfolio which guide large group extensions, individualized enrichment and student course and project selection. This new approach would utilizes a Program Facilitator to lead the initiative.

## SCHOOL RENEWAL PLAN FOR 2013-14 through 2017-18

ØStudent Achievement $\square$ Teacher/Administrator Quality $\square$ School Climate $\square$ Other Priority
GOAL AREA 1: Raise the academic challenge and performance of each student.
PERFORMANCE STATEMENT: Meet the state and federal accountability objectives for all students and subgroups in writing each year.

FIVE YEAR PERFORMANCE GOAL: Meet or exceed the standard in writing as measured by SC Ready.
ANNUAL OBJECTIVE: Annually meet or exceed the standard in writing as measured by SC Ready.
DATA SOURCE(S): ESSA Federal Accountability and SDE School Report Card_

PASS \% WRITING

## SCHOOL RENEWAL PLAN FOR 2013-14 through 2017-18

§Student Achievement $\square$ Teacher/Administrator Quality $\square$ School Climate Other Priority

GOAL AREA 1: Raise the academic challenge and performance of each student.
PERFORMANCE STATEMENT: Meet the state and federal accountability objectives for all students and subgroups in writing and English Language Arts each year.

FIVE-YEAR PERFORMANCE GOAL: Maintain the percentage of students meeting standard (Met and Exemplary) in writing as measured by the Palmetto Assessment of State Standards (PASS) from $\underline{\mathbf{9 2 . 5} \%}$ in 2012 to $\mathbf{9 2 . 5 \%}$ in 2018.

ANNUAL OBJECTIVE 1: Maintain at least 92.5\% of students meeting standard (Met and Exemplary) in writing as measured by the Palmetto Assessment of State Standards (PASS).

ANNUAL OBJECTIVE 2: Annually increase by 3\% percentage points of Sterling elementary program students scoring Met and Exemplary on the PASS Writing.

DATA SOURCE(S): SDE School Report Card

| Writing | Baseline <br> 2011- <br> $\mathbf{1 2}$ | Planning <br> 2ear <br> $\mathbf{1 3}$ | 2013- <br> $\mathbf{1 4}$ | 2014- <br> $\mathbf{1 5}$ | 2015- <br> $\mathbf{1 6}$ | 2016- <br> $\mathbf{1 7}$ | 2017- <br> $\mathbf{1 8}$ |
