This project is on a critical timeline, and a vendor’s ability to provide the product within the specified period of time will be examined and included in the evaluation. The submission of a bid for review does not necessarily qualify the Vendor as being responsible or the bid as being responsive. Failure to provide specific information as requested for use in an evaluation will cause the bid to be disregarded.

The District may request written or oral clarifications of any offer received. However, the District may, at its sole discretion, refuse to accept in full or partially, the response or clarification given by any Vendor.

Vendors are cautioned that the evaluators are not required to request a clarification of the bid; therefore, **all offers should be complete and reflect the most favorable terms to the District.** The District reserves the right to reject any and all offers when such rejection is deemed to be in the best interest of the District.

It is understood and agreed that the bid is for the services and products specified or a District-approved equal. The District does not guarantee that the District will require any specified project or item.

The District reserves the right to accept or reject, in part or in entirety, any or all bids or portions of bids submitted by any Vendor and to waive any informalities or technicalities so as to purchase in the best interest of the District. The District reserves the right to interpret the acceptability of the proposed services and supplies when meeting the intent for use as determined by the end user.

The District reserves the right to negotiate with all responsible Vendors and to cancel in part or in entirety, this solicitation if it is in the best interest of the District. This solicitation does not commit the District to negotiate,

hold discussions, award a contract, pay any costs incurred in the preparation of the response to this solicitation or to procure any services and/or supplies.

The District may conduct discussions with responsible Vendors that submit bids for the purpose of clarification to assure a full understanding of the requirements of the IFB and the clarification of any bid. Any award shall encompass all of the requirements of the solicitation. The initial period of performance begins after issuance of a Purchase Order.

After the contract is awarded, no additional costs will be considered. Hidden or undisclosed costs will not be accepted.

The District cannot guarantee that any particular vendor will be selected or any business conducted as a result of this solicitation. The failure of a specific vendor to receive business, once an award has been made, shall not be grounds for contract controversy.

The award statement will be posted in the Procurement Department, 2 Space Drive, Taylors, South Carolina. The award will also be posted on the Procurement Department website. # Class 4 Markings Certification for Running Tracks

## Instructions to Surveyor

Version 5/4/12

### 1. Purpose of this document:

#### 1.1 Intended use.

This document is intended to serve as verification to the owners of the facility that their track meets the requirements of the NFHS in the categories described below. Class 4 Certification is intended to be completed as an integral part of the striping, and not as an after-the-fact undertaking. Although the process can be performed after the fact, corrective work to the markings can be difficult, time-consuming, and expensive. This form has been published by the American Sports Builders Association to assist owners of track facilities in verifying that their track facility meets the official requirements of the relevant governing body of the sport. The American Sports Builders Association makes no representation with respect to the requirements of any governing body, nor does it warrant or guarantee the accuracy or correctness of the measurements or conclusion of the certifying party.

#### 1.2 Completion of the form.

This form may be completed by a competent measurer, such as a Registered Land Surveyor, Professional Engineer, Certified Track Builder (CTB) or experienced track striper.

### 2. Relevant parameters of the sport:

#### 2.1 The track oval.

The 400m oval typically consists of two semicircles of equal radius, which are joined by two straights of equal length. The inside of the oval track shall be bordered with a white line 5cm wide and may include a curb of suitable material, approximately 5cm in height and width, installed on top of the white line. The theoretical running length of the oval shall be measured on the surface of the track along the theoretical path of the runner (known as the measuring line). The painted line is to be located 20cm inside the 400m measuring line (toward the inner field) if no curbing is to be installed over the line. If designed and surveyed for curbing to be installed over the line, the painted line is to be located 30cm inside the 400m measuring line. All other lane lines are to be located 20cm inside the corresponding measuring line for that lane. The actual length of the 400m measuring line should not be less than 400m, or more than 400.08m.

#### 2.2 Individual races.

The horizontal variance allowed for the individual races is between 1 and 1.0002 times the specified length along the measuring line for each lane. The location of incidental markings, such as hurdles, steeplechase barrier placements and baton exchange zones should be noted.

### 3. Report of Measurement:

#### 3.1 Surveyors Identification Data and Survey Conditions:

Complete the document for Report of Measurement. Attach valid certificates of accuracy of instruments.

### 3.2 Oval lines layout – before painting the lane lines

- a. Locate the centers (radius points) of the two semicircles.
- b. Measure the distance between the centers of the two semicircles. The deviation from the desired value should not exceed 0.007 meters.
- c. Place a mark on the synthetic surface at the specified radius for the outer edge of the inside line at points 1–13, which are 15 degrees between points. These are the radius control points. At the same angles, place marks in the same manner for all other lane lines.
- d. Repeat this procedure for points 14–26.
- e. Measure the distance between points 13 and 14 (line AB). The deviation from the desired value should not exceed 0.007m. Record the measured distance on Table 1.
- f. Measure the distance between points 1 and 26 (line CD). The deviation from the desired value should not exceed 0.007m. Record the measured distance on Table 1.

### 3.3 Oval lines verification – after painting the lane lines, before installing the curb (if applicable)

- a. At points 1–13 and 14–26, measure the distance between the radius control points and the outer edge of the painted line. Record the measured deviations on Table 1.
- b. Calculate the average deviation from the desired value of radius of curve DA and BC. Record the average deviations on Table 1.
- c. Calculate the length of curves DA and BC, the length of the inside border, the theoretical running distance of the track and the deviation of the theoretical running distance from 400m following the instructions on Table 2. If such deviation does not exceed +0.08m (and is not short of 400m), the 400m oval can be considered dimensionally accurate.
- d. Although a table is not provided, the surveyor should verify that radii for all lanes meet the same criteria as 3.3.c, and that the average line radii do not vary more than .015m from the design radius when averaged at points 1 through 26, with no individual point varying more than .03m.

### 3.4 Track event layout – before painting

- a. Using certified, computer-generated calculations, or data file derived from such, place a mark at the locations for the starting and finishing lines of all events. These are the start/finish control points. At the option of the contractor and surveyor (if the two are separate), the surveyor may also layout the locations of all other track markings, such as hurdles, steeplechase barrier placements and baton exchange zones.

### 3.5 Track event verification – after painting

- a. Measure the distance between all start/finish control points and the leading edge of each painted start and finish line. Record the deviations on Table 3. If the combined total deviation of each start line and the finish line for that event do not exceed  $+ .0002 \times \text{design course length}$  (and is not short of design length), the event can be considered accurate.
- b. The surveyor should verify the location of the steeplechase barriers (if required), and randomly, at least 9 incidental markings (hurdle placements, exchange zones, etc.) and record the deviations on Table 4.

## 5.2. Calculation of the length

The theoretical running distance of the oval track and its deviation from 400m are calculated as described in Table 2.

#### 6. Certification of Length

- We hereby certify that all measurements and information shown on this report are accurate and are the result of a well-conducted survey.
- The measurement for lane one was 0.30 meters.... 0.20 meters.... (check one) outward from the inside border.
- The control of the inside length of the track gives a length greater than 400 meters.
- The calculated distance of .....m is within the acceptable plus tolerance of 0.08 meters.

### **GOVERNING LAW**

The contractor or offeror shall comply with the laws of the State of South Carolina which require that it be authorized and/or licensed to bid and/or conduct business in said State. By signing an Agreement or by offering a bid or proposal or agreement, contractor agrees to subject itself to the jurisdiction and process of the District’s Procurement Code and Regulations, the courts of the State of South Carolina or federal courts as to all matters and disputes arising or may arise under and in regard to the solicitation, Agreement and the performance thereof, including any questions as to the liability for taxes, licenses or fees levied by the State.

The solicitation and/or Agreement and any dispute, claim or controversy relating to the solicitation and/or Agreement shall, in all respects, be interpreted, construed, enforced and governed by and in accordance with the Procurement Code and Regulations of The School District of Greenville County and the laws of the State of South Carolina. All disputes, claims or controversies relating to the Agreement shall be resolved exclusively by the District’s Chief Procurement Officer or Purchasing Agent/Procurement Director in accordance with Article XIV of The School District of Greenville County’s Procurement Code or in the absence of jurisdiction, the Court of Common Pleas for, or a federal court located in, Greenville County, State of South Carolina. Contractor or offeror agrees that any act by the District regarding the solicitation and/or Agreement is not a waiver of either the District’s sovereign immunity or the District’s immunity under the Eleventh Amendment of the United States’ Constitution. As used in this paragraph, the term “Agreement” means any transaction, contract, understanding or agreement arising out of, relating to, or contemplated by the pertinent solicitation and/or agreement between the proposer and the District.

The District shall not accept, enter into or sign any proposed agreement(s), document(s), offer(s), contract(s), leases(s) and/or provision(s) that materially conflicts with the District’s General Terms and Conditions, the requirements of a solicitation or which are determined not to be in the best interest of the District.

The solicitation and the District’s General Terms and Conditions shall govern and take precedence as the contract between the District and the awarded entity. The terms of the agreement between the District and the successful/awarded entity shall comply with the requirements contained in this solicitation and the District’s General Terms and Conditions.

### **CONTRACTUAL NEGOTIATIONS**

Contract negotiations, if applicable, may be started at the District’s discretion, with the apparent successful offeror. If any points/issues exist that cannot be resolved, so that a final contract, to the mutual satisfaction of all parties, can be reached, negotiations may be initiated with the next qualified offeror. All contractual documents submitted will be subject to approval of the District.

## CONTRACT DOCUMENTS & ORDER OF PRECEDENCE

- (a) Any contract resulting from this solicitation shall include the following documents: (1) a Record of Negotiations, if any, executed by the vendor and the District, (2) documentation regarding the clarification of an offer, if applicable, (3) the solicitation, as may be amended, (4) modifications, if any, to an offer, if accepted by the District, (5) the vendor's offer, (6) any statement reflecting the District's final acceptance (award), (7) purchase orders, and (8) any related contracts or agreements executed by the District and the proposer. Each offeror shall fully acquaint itself with conditions relating to the scope and restrictions attending the performance of obligations under the conditions of this solicitation or agreement. The omission of an offeror to acquaint itself with existing pre-contract conditions or post-contract consequences shall in no way relieve such offeror of any obligation with respect to the proposal or to any contract resulting from a solicitation or agreement. Offerors are notified that failure to inspect, familiarize or otherwise gather information as to the total cost to the District will, in addition to any and all other remedies available, create cost difference liabilities and claims against the ultimately successful contractor. Offerors shall notify the District of all costs reasonably expected.

## BID/PROPOSAL/AGREEMENT CONSTITUTES OFFER

By submitting a bid/proposal or agreement, the offeror agrees to be governed by the terms and conditions as set forth in the solicitation document or proposed agreement and the District Procurement Code and Regulations. Any bid or proposal response or proposed agreement containing variations from the terms and conditions set forth herein may, at the sole discretion of the District, render such bid or proposal or agreement non-responsive. Any inconsistencies between the solicitation and any other contractual instrument shall be governed by the terms and conditions of the solicitation or proposed agreement, except where subsequent amendments to any contract resulting from the award are specifically agreed to in writing by the parties in order to supersede any such provisions of the solicitation or other contractual document.

## SPECIFICATIONS MANDATORY

The offeror must meet all of the mandatory specifications and requirements set forth in the solicitation or proposed agreement. By incorporating said specifications into the offeror's response, subject to acceptance by the District of any amendments hereto as submitted by the offeror, the offeror is agreeing to comply with said solicitation specifications or agreement. Failure to provide mandatory evidence of capability will result in a low evaluation ranking of the offeror's bid/proposal. Items designated as evaluation factors will be evaluated and rated in accordance with the evaluation criteria, if applicable.

## INQUIRIES

Every effort has been made to ensure that all information needed by an offeror is included herein. If an offeror finds that it cannot provide a response without additional information, it may submit written questions to the person designated herein on or before the deadline set forth in the solicitation. Questions shall not be accepted by the District after the specified date. All replies to questions will be in writing and contained within an addendum. All questions and written replies will be distributed to all known interested firms and individuals via an addendum and will be regarded as a part and parcel of the solicitation.

## AMENDMENTS OR ADDENDA

If it becomes necessary to revise any part of the solicitation or agreement, amendments in the form of an addendum will be provided in writing to all known, interested firms and individuals.
