

After School Enrichment Program at Bethel Elementary

brought to you by Roper Mountain Science Center

Advanced LEGO WeDo Robotics — Grades 3-4

Program Description

Using LEGO's new WEDO 2.0 kits students will take their robot programming skills to the next level. These cordless robots exceed the capabilities of the original WeDo kits. Each session students will build a different robot, then they will be given design challenges to program the robots to perform several tasks. Unlike our other WeDo classes, students will focus on developing their own programming instructions to control their robots. Wireless robots and tablet controls allow students to unleash their robot programming skills!

Program Details

Location: Bethel Elementary

Class: Advanced LEGO WeDo Robotics

Grades: 3-4

Day: Mondays

Dates: February 25, March 4, 11, 18
