

Mornings

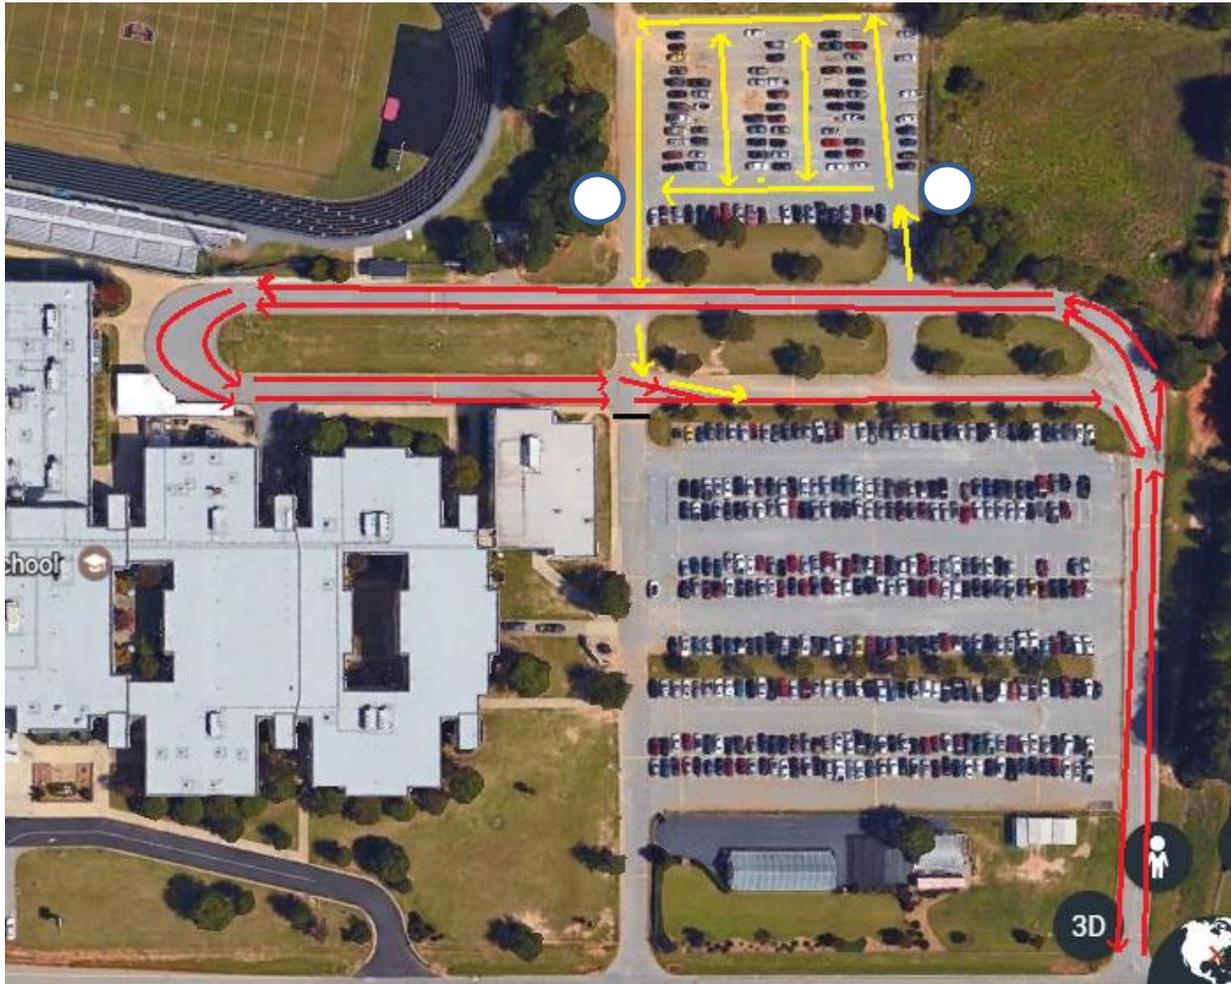

- Drivers along the school side curb should **advance as far forward toward the end of the metal canopy as traffic will allow**. The more students we can unload at a time the quicker the car line will dissipate.
- Students should **exit their car** if you have stopped on the school side curb and are **even with or past the stadium light post**.
- Students may be dropped off on the outer curb (grassy median side of the loop). Students should walk directly across the loop and not walk across the upper part of the loop. Students need to be very aware of moving traffic.

Afternoons

- Traffic moves much more slowly in the afternoon than the morning and students may cross the upper loop.
- **Students should walk out to their car when the car has stopped even with or past the stadium light pole.** If you are a parent who phones or texts your student, please do so just before you reach the stadium light pole so the student can move out to curb by the time you are stopped. Having students wait for their car to reach the top of the loop slows down departure.
- **NEW for 2017-18** Once traffic reaches past the first entrance to the back student parking lot, cars will be directed to move through the parking lot.

Back student parking lot.

If the car loop traffic has backed up into the back student parking lot, you may get out of line, park in a parking space, and text your student to walk down to the back student parking lot. Once your student has arrived please leave by way of the second exit (circle #2).
