SECOND GRADE

Second Grade Explorations

An exciting day of learning awaits your students as they explore multiple immersive lessons! Besides taking part in two different 45-minute learning lab pairings of your choosing, students will also experience an engaging planetarium presentation. 9:30am - 1:00pm.

Planetarium Show

The Great Undersea Adventure of Barney and Beenie

New!

This fun educational and entertaining show for children dedicated to the protection of the environment, namely the protection of the seas and oceans. Two friends, Barney and Beenie, take care of the cleanliness of their ocean lagoon. Many adventures await them, one of which is the rescue of a small turtle stuck in a plastic net. And at night, friends learn the constellations. Science Standards: 2-LS2-1

Along with the planetarium show,
choose one of the following three options:

Option A (see lab descriptions on following page) Erosion Commotion

AND

Animal Explorations

Option B (see lab descriptions on following page) Nature Quest

AND

Surviving In the Wild

Option C (see lab descriptions on following page) Our Home: Then & Now

AND

Our Farm: Then & Now

Continued on next page.

SECOND GRADE

Continued from previous page.

Along with the “Life of Trees” planetarium show, choose one of the following three options:

Option A - Environmental Science Building Erosion Commotion

New!

Using stream tables, students will make it rain and then flood to observe how water changes the shape of the land and causes erosion commotion to a neighborhood community. After observing the rain events, teams will need to engineer solutions to prevent the neighborhood from washing away.

Science Standard: 2-ESS2-1

Animal Explorations

Students will compare the diversity of animals that live in our pond and forest habitats on Roper Mountain, such as frogs, salamanders, insects, and snakes. By observing the structures of live animals, students can then infer how the structures help them function and survive in certain habitats.

Science Standard: 2-LS4-1

Option B - Harrison Hall of Natural Science Nature Quest

Students will enjoy a guided nature walk through different environments to discover how animals and plants depend upon their habitats to survive. Emphasis will be placed on diversity of life found in land and in the water.

Science Standard: 2-LS4-1

(NOTE: in the event of inclement weather, and in winter students will remain indoors and explore the rainforest and other habitats)

Surviving In the Wild

From the mountains to the sea, students will explore different habitats within SC in our Ecology Lab and discover how plants and animals survive in these awesome habitats.

Science Standard: 2-LS4-1

Option C - Living History Farm Our Home: Then & Now

Explore change over time in the way Americans live, work and play. Using artifacts from the 1800s, students will assist with tasks around our historic log cabins, learn about historic clothes and toys, and make a dipped candle to take home!

Social Studies Standards: 2.H.3, 2.G.3

Our Farm: Then & Now

Students will experience a bygone era of farming and rural life by participating in 1800s farm chores, noting patterns of continuity and change as we observe plant needs, pollination, and seed dispersal while working in our heritage garden; visit our blacksmith shop and one-room schoolhouse; and care for our farm animals.

Social Studies Standards: 2.H.3, 2.G.3 Science Standards: 2-LS2-1, 2-LS2-2
