First Name _____ M Initial _____ Last Name _____

Address _____ Telephone _____

City _____ State _____ Zip _____

Date of Birth _____ Email _____

Understanding the Dual Enrollment Program:

Parent & Student MUST initial each item confirming understanding of implications & requirements of Dual Enrollment Programs:

___ / ___ Dropping a Class - Students and parent/guardian agree that they will not request to drop any dual enrollment course at any point after the University/College predetermined course drop date. If withdrawing, the student would still be subject to the University/Colleges terms regarding course withdrawals and The South Carolina Uniform Grading Policy

___ / ___ GPA/Grading - Students completing a dual enrollment course receive credit and corresponding grades for both their high school and college transcripts. In most cases, the high school credit is weighted at the Dual Credit level as assigned by the SC Uniform Grading Policy. Students and parents understand that they are beginning their post-secondary transcript. Poor performance, failure, or withdrawal from a dual enrollment course can effect athletic eligibility during the following semester.

___ / ___ Attendance - Students are expected to follow all applicable college attendance expectations. In some cases, this may result in a student missing a school sponsored assembly, trips, etc.

___ / ___ Transportation - For Dual Enrollment courses taught off high school campus the student and parents/guardian is responsible for transportation to the appropriate University/College Campus.

___ / ___ Course Request - The student's school counselor must approve all coursework prior to enrolling in all college-level course work. If a student is taking a dual enrollment course to fulfill a core graduation requirement, then the student's school counselor must give approval.

___ / ___ Scheduling - I understand that students who are taking dual enrollment courses either on-line or on a University/College Campus will not have a dedicated teacher or room assignment from their home based school, therefore they are not required to be on campus during the time of the scheduled course. However if a student wishes to utilize the school building or school resources to complete the Dual Enrollment course they must first make arrangements with the school administration.

___ / ___ E-learning Success Courses - Many Universities/Colleges require an introductory course prior to enrollment in any virtual college course. Students may elect whether they want this .25 credit course added to their high school transcript, but it will remain on their post-secondary transcript. The decision to elect to be added to high school transcript can only be made prior to the beginning of the course.

___ / ___ Accommodations- Any students with accommodations like a 504, ILAP, or IEP needs to go through the College/University Student Disability Services and their process, if they wish to have accommodations in their dual credit courses.

___ / ___ Course Content - The syllabus and content for college level courses is set and dictated by the college. We encourage parents to review the syllabus to ensure they are comfortable with their child engaging in the content of the course. Because the content is created by the college, no alternative assignments will be provided since the course is under the purview of the college and not Greenville County Schools

Parent/Guardian Signatures below confirm Agreement and Adherence to the above Statements & Criteria:

Printed student name & signature: _____ / _____ **Date:** _____
Printed parent name & signature: _____ / _____ **Date:** _____
