

Tigerville Elementary Fourth Grade

LEVEL UP!

4TH GRADE MOTTO

- *Be nice.*
- *Work hard.*
- *Respect others.*

Tigerville Elementary School
25 Tigerville Elementary School
Rd.

Fast Fact Goals:

1. Addition and Subtraction (0-20)
2. Mixed Multiplication to 12
3. Mixed Division to 12
4. Mixed Multiplication and Division
5. Simplifying Fractions

LEVEL UP!

4th Grade: Level Up!

Welcome to fourth grade. We are so excited about the upcoming school year. Transitioning into fourth grade is sometimes challenging for children. The workload becomes greater and the expectations are higher. We will make sure that your child has a smooth transition and a successful year!

We have included some items that you can work on with your child this summer in order to better prepare them and some expectations that may be different from previous years.

Expectations

Homework: This year in fourth grade, your child will have reading homework every night and math on most nights. Students are expected to complete homework every night.

Handwriting: Students are expected to have legible handwriting in 4th grade. We will not accept work that is not written neatly. Students will be expected to redo work that is below standard.

Supplies: Please be sure your student has all necessary supplies for 4th grade. This year we're asking students to bring pencil pouches rather than pencil boxes, because with the transitions from class to class they'll be more durable and not break as easily if dropped.

Class Changes: Your student will have lots of transitions during 4th grade. We will switch classes (and teachers) for science, social studies, and math. Your student needs to be ready to do things quickly and efficiently to limit the amount of time we waste.

Summer

Reading: Each student at Tigerville is expected to read over the summer. Research shows that students who do not read over the summer can go down 2-3 reading levels. Your students will receive a summer reading log to fill out!

Math Practice: Students can login to their ixl account with their student login. Students can work on any lesson from ixl. It would also be helpful if you could work on telling time, multiplication facts, division facts, fractions, geometry, and counting money. These are important skills that will be used often in throughout all 4th grade math.
