

Dear Parents and Third Graders!

Welcome to third grade! As we make plans for your upcoming year third grade year, we want to help you make plans for a successful year also! As a third grader parent, we hope you will encourage your child to have good study habits, and to become an even more independent learner. It is imperative that your child learns responsibility and organizational skills in third grade. In addition, please help your child memorize the addition and subtraction facts, and your child can begin memorizing the multiplication facts by using flashcard or go online. There are many free practice sites. Please encourage your child to read every day over the summer. We look forward to seeing you at the drop in at “Meet the Teacher” on Thursday, August 16th from 4:00 until 6:00.

Enjoy your summer!

Third Grade Teachers
