

ATTENTION WOODLAND PARENTS

Re: Update Dismissal Procedures

Effective: December 8, 2014

Please note the following updates to our afternoon dismissal process:

1. Once your group has moved to the front of the school and you have stopped your car in the front loading zone, parents will turn off the car engine. We ask that you do not restart your car until all students have been safely loaded and the group is ready to be released.
2. Students should enter their car from the center aisle only. Please refrain from asking your child to go around to the other side to load.
3. Please remember that the car line is a cell free zone. Information shared with us through **SAFE KIDS GREENVILLE** indicates that distracted driving leads to accidents.

Thank you for your attention to this message and your cooperation in our efforts to provide a safe dismissal process.
